Cost Estimate for a New Records Center Building

1. We are now preparing a staff study for the purpose of justifying the erection of a separate Records Center Building outside the metropolitan area of Washington.

2. As a part of this study we would appreciate your obtaining schematic drawings and cost estimates from the GSA for a building meeting the general specifications shown below. Two estimates should be obtained, one for the building above ground and one below.

Design: Simple one story fireproof building with economical fixtures and finishes throughout. A fire detection, but not a sprinkler system, should be included.

Construction: Reinforced concrete, concrete floors with asphalt tile on office and aisle areas.

Storage Area: Secured with combination locks on the doors, preferably one large area.

Lighting: Florescent lighting throughout with fixtures in storage area to be centered in aisles 60" from center to center.

Approximate Space Assignments:

Records	57,500
Office	400
Storage (Secured Areas)	400
Processing	400
Reading or Searching Rooms	600
Microfilming	200
TOTAL	59,500

3. Please expedite this request as much as possible.
